

Important information:

Your Sage Accounts software and changes to HMRC Government Gateway.

HMRC Government Gateway changes: **14 February 2018**

The current HMRC gateway submission end point is changing and from **14 February**, unless you have the latest version of Sage 50cloud Accounts or Sage 50 Accounts, **you won't be able** to make submissions directly from your software. Submissions include:

- VAT Returns
- EC Sales lists
- CIS Returns
- RTI submissions
- IR secure mailbox
- CIS subcontractor validations

Put this date in your diary

The current HMRC gateway submission end point is changing on **14 February 2018**. Make sure you're prepared.

How to check your version

In your Sage Accounts software, on the menu bar simply click **Help**, then click **About**.

Next Steps

If you're using the latest version

If you currently use **Sage 50cloud Accounts or Sage 50 Accounts version 24 and above**, your software is already compliant with the gateway changes. You can continue to make online submissions from your software as normal after 14 February 2018.

If you're using an older version

If you currently use **Sage 50cloud Accounts, Sage 50 Accounts, or Sage Instant Accounts version 23 and below**, to continue to make online submissions directly from your software, you'll need to upgrade to our latest version.

If you decide to continue running an older version of Sage 50 Accounts, when the Gateway submission point changes, you can submit manually through the HMRC website.

Moving to our latest version

It's easy and provides the comfort that you're ahead of future changes in legislation. **Sage 50cloud Accounts** is the accounts software you know and love, now with cloud connected features like Microsoft Office 365.

Sage 50cloud Accounts means:

- **Automatically backing up** your work in the cloud
- **Getting paid on time**, every time, improving your cashflow and reducing admin
- Syncing contacts and emails to avoid toggling between windows, **on any device**
- Photographing receipts and uploading them from mobile devices, **wherever you are**
- **Securely storing everything** in the cloud, so you can ditch the paperwork
- Accessing reports with Excel to **make faster decisions**

And lots more!
